

Your one-stop-shop for holiday park WiFi & Internet access

A fully managed WiFi service

By providing fully managed high speed Internet access, local area network architecture alongside support and preventative maintenance, in addition to installation of all WiFi access points, Wifirst presents a holistic approach, offering maximum security and complete peace of mind for site managers and resort owners:

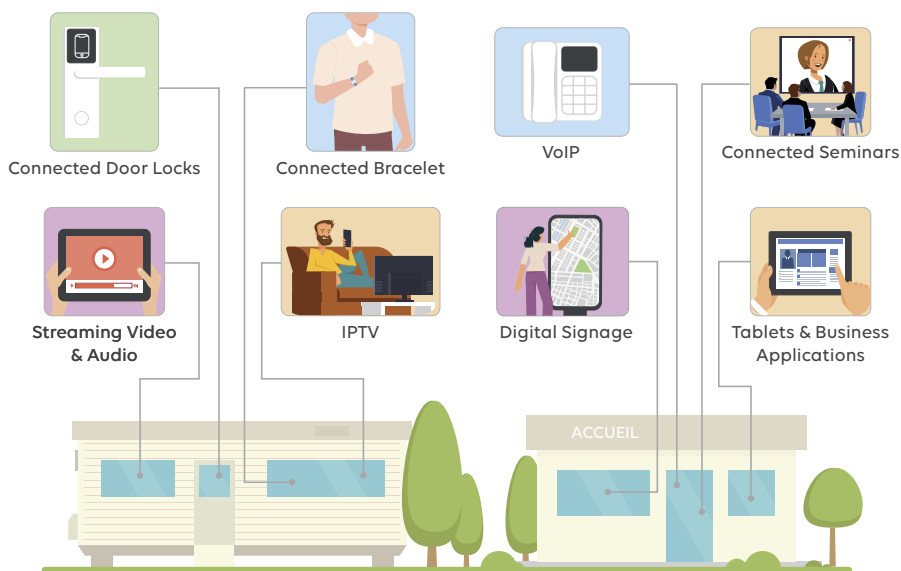

Yeatheridge Farm Caravan & Camping Park
East Worlington • Devon

Yeatheridge Farm wanted to improve WiFi access around the campsite and caravan park to ensure their visitors were able to stay connected. Mobile coverage isn't the best and they recognised that although some people prefer to be 'offline' during their stay, for a large number of people, particularly the younger generations, remaining connected is vital. Wifirst helped deliver a fully connected campsite that met their budget and needs for visitor and staff WiFi access throughout the campsite.

Digital convergence

We build a converged network, connecting all of your equipment and user profiles:

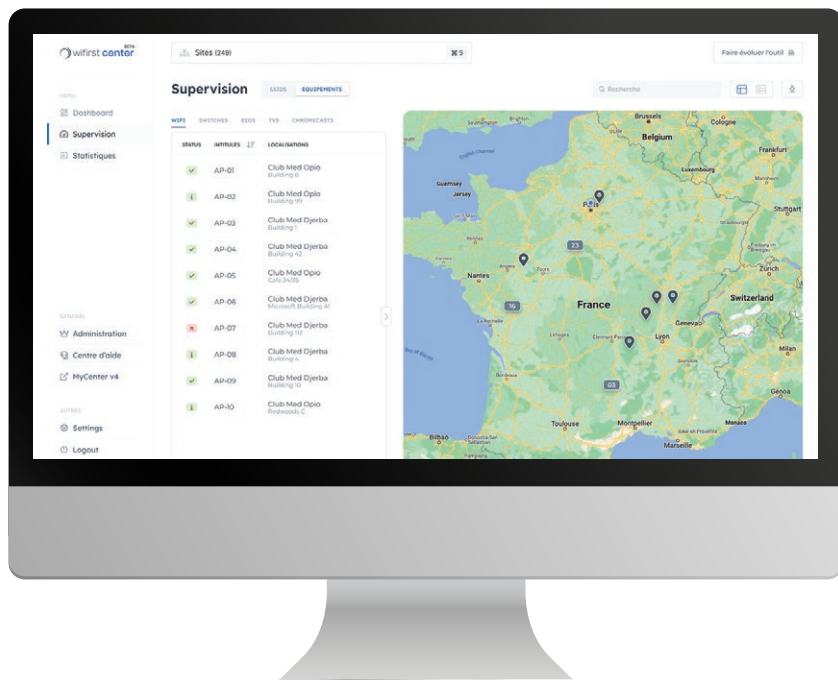

- **Guests:** Offer a personalised WiFi experience meeting the coverage requirements of a holiday park environment both indoors and outside. Nowadays, everyone regardless of age has access to a smartphone or a tablet, and wants to enjoy the various streaming platforms everywhere, even in the great outdoors.
- **Staff:** In order to facilitate business connectivity demands, it is essential to have a high-performance and reliable WiFi network. This will help ease the workload of staff, allowing them to focus on high value-added duties.

Supported by Wifirst with connectivity, since 2020 the group has been offering a Sea Work & Sun promotion to work remotely in the heart of nature or by the sea in its connected campsites. The Internet connection is powerful enough to remote work efficiently and provide access to all communication tools, including video conferencing...

Extranet at your fingertips

The Wifirst Center is a service management and monitoring tool for our customers. A next generation Cloud platform providing valuable user information and network statistics in real time.

Wifirst was appointed as Yelloh! Village connectivity provider in 2018. The Yelloh! Village network includes 93 campsites, with more than 25,000 pitches across France, Spain and Portugal. Satisfaction surveys completed on the 4 and 5 star resorts regularly place campsites equipped by Wifirst at the top of the rankings for WiFi services.

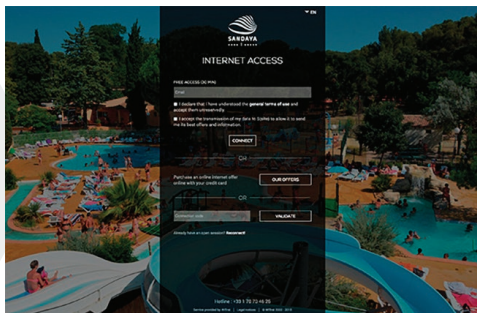

A truly bespoke approach

Wifirst is the only Internet service provider able to offer high speed Internet access alongside skilled installation of wireless network infrastructures within outdoor hospitality resorts. Thanks to this solid connectivity foundation, Wifirst is a dependable partner to support your customer approach and connected services.

Expert advice

What coverage will the WiFi network have? How fast will the connectivity be? Wifirst's experts will be happy to answer these and many other questions to help define your specific project requirements.

Tiered services

Free WiFi or paid WiFi for customers? Wifirst can help you make the right decision or find the right balance for your business and guest needs.

Expand your offering

Aware of the need for outdoor hospitality sites to attract new customers, Wifirst has developed a range of technical solutions to help diversification (for example, by hosting events or remote working).

About Wifirst

Founded in 2002, Wifirst is the European leader in professional WiFi. A pioneer in the "WiFi as a Service" approach, Wifirst is committed to continuous innovation in order to offer a network capable of absorbing the spectacular increase in Internet usage, to offer high value-added services and to make WiFi the technical foundation of its customers' digital transformation.
