

“It is a pleasure to work with the Kley team, who are very open to new connected services for students. The Kley Marseille residence is the first student residence where we have tested our Room Area Network solution.”

Etienne Détrie
Marketing Director, Wifirst

01. CONTEXT

Created in 2014, Kley the latest player in student residences that is refreshing the market! Kley is revolutionising the student residence market with an innovative concept serving a new state of mind: the "Happy Performance".

Wifirst is very proud to accompany this new player to the student market. 6 residences are currently in service: Saclay, Rennes, Marseille, Caen, Angers, Toulouse. In total, 2,368 student residences are connected to WiFi and fibre.

02. CHALLENGES

Kley was the first company to test our Room Area Network solution. This promise of WiFi that is truly "like-at-home" appealed to the Group's Director of Operations. Interfacing work was carried out with the publisher of Kley's hosting software (AD Présence) to display the students' personal WiFi passwords on the residence's mobile application.

03. RESULTS

Traffic records are being set for Kley's first academic year (September 2018). A total of 115TB (download) and 15TB (upload) of data was consumed in the month of September from the 2,368 rooms, giving an average of 56GB of data exchange per room.
