

ABERDEEN ALTENS HOTEL

A major conference center in Scotland

We are thrilled to work with Wifirst! We were all pleasantly surprised of how quickly and easily the installation has been set up, with an immediate impact on guest satisfaction.

Kris Manship
GM of the Aberdeen Altens Hotel

In March 4,300 users connected to the WiFi consumed over 7.5 Tbytes of data.

01. WIFIRST'S CHOICE

The Aberdeen Altens hotel, a 4-star hotel of 220 rooms with extensive conference facilities, under Redefine|BDL Hotels management, has chosen Wifirst to deploy a new fibre and its "WiFi as a Service" solution.

02. THE CHALLENGE

Wifirst designed, managed and installed a 500 Mbps internet fibre and a brand new WiFi network, phasing out the 5 years old legacy infrastructure, without any service interruption.

03. CONCRETE RESULTS

All guests now enjoy a strong WiFi across the entire hotel -no blind spots- and at amazing speeds, at all times.

Wifirst 500 Mbps fibre and Wibox gateway can absorb high demand and deliver great HD streaming experience during pick hours.
