SENIOR LIVING

Improve your residents' well-being and staff mobility with perfect WiFi and smart connectivity

An all-inclusive WiFi and Fibre solution

New technologies make it possible to both reduce the isolation of residents and facilitate the work of staff in senior living. Video calls, telemedicine, home automation systems... the list of innovations out there to improve the well-being of senior residents while optimising the working conditions of care staff is growing.

All these technologies have one thing in common: they need efficient and secure internet access.

LES GIRANDIÈRES
Résidences Services Seniors

Our intention was to create a WiFi network tailored to the needs of the senior residents, and this is exactly what was achieved. WiFi access is fast, reliable and most importantly very easy to use. Just one click and users are online and able to keep in touch with their loved ones.
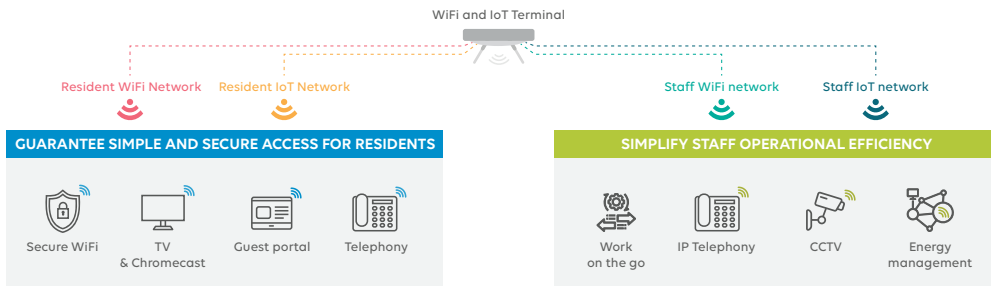

A unified network for all your needs

Wifirst connects all your wired and wireless services on a single, secure and resilient network.

- **Patients/residents:** keep in touch with family and friends and benefit from better medical care

- **Visitors:** benefit from a fully secured WiFi access

- **Medical and administrative staff:** facilitate access and sharing of information, and improve working conditions while on the move within establishments.

THE RESULTS

▶ Easier operational management

▶ Energy and cost efficiency

▶ Increased security and quality of service

WiFi and IoT Terminal

| Resident WiFi Network | Resident IoT Network | | Staff WiFi network | Staff IoT network |

GUARANTEE SIMPLE AND SECURE ACCESS FOR RESIDENTS

| Secure WiFi | TV & Chromecast | Guest portal | Telephony |

SIMPLIFY STAFF OPERATIONAL EFFICIENCY

| Work on the go | IP Telephony | CCTV | Energy management |

KORIAN

We provide our client Korian with our captive portal solution for the patient/visitor WiFi in a hundred or so clinics (personalised portal, code management and CB payment platform, connection logs, usage statistics and quality of service management).

Fibre & Connected Services

To simplify the management of your multiple service providers, Wifirst acts as the single point of contact for all your connectivity issues.

Benefit from a dedicated contact person. In the event of an incident, only Wifirst is responsible : an end to the ping pong of liabilities between service providers.

Dedicated fibre line (FTTO)

- Guaranteed and symmetrical broadband
- Professional service commitments (4h GTR, 99.9% availability and 24/7 support)
- Security and legal protections

Wifirst Center

- Cloud-based network management platform
- Simplified management & advanced features
- Marketing and operational data

Digital signage

- Infinite display possibilities
- Simplified management interface
- Cost-effective solution without additional hardwaree

Room Area Network: WiFi "better than at home"

In a standard collective WiFi architecture, all users are on the same network (same VLAN) and traffic segmentation is activated by default for obvious security reasons: in practice, this means that the connected equipment cannot see each other on the network.

Wifirst created a secure connection bubble by developing the Room Area Network, based on Ruckus Wireless technology. With it, users connect to the secure network in their room with an individual WiFi password and can, for example, easily listen to music on a WiFi speaker, stream content from their smartphone to the TV in their room or control home automation systems.
